

Heels Above™

Heels Above come in four sizes to fit the diameter of practically any high heel. Just print out this size chart, compare the size of your heel to the heel diagrams below to determine the perfect fit. Each heel protector has the size stamped on the bottom of the disc for your convenience. Please remember: The height of your heel or your shoe size are not determining factors in choosing which Heels Above will work best for you—only the diameter of the heel itself.

This chart may not work if used from a portable electronic device such as a mobile phone or tablet as it is not optimized to correctly display the various sizes of heel measurements. Please use printed chart only.

Super Skinny

7.5mm–9mm

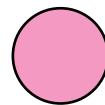

Extra Small

9.5mm–11mm

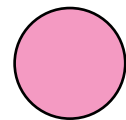

Small

11mm–12.5mm

Medium

13mm–15mm

A FEW THINGS TO REMEMBER:

- The fit should be nice and snug – never loose.
- As mentioned above, the height of your heel or the size of your shoe have no bearing on the diameter of your heel. Measure only the diameter of the heel.
- Heels Above are not “lifts” and don’t add any height to your heel.
